

Kinetics Controls & Innovation Ltd

Service & Product Awareness

Integrity Solutions Supporting Ageing facilities

Overview

Kinetics Controls & Innovation Ltd

- ❑ Established in 2002
- ❑ Office, Workshop and Manufacturing facility in Dyce, Aberdeen, UK
- ❑ Specialising in Well Integrity Engineered Leak Solutions

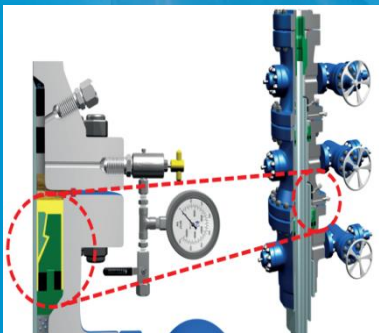

Advanced Leak Sealing Technology

Sectors of Operation

- ❑ Wellhead, Christmas Tree Valve & Topside Valve Isolations
- ❑ Annulus & Downhole Isolations
- ❑ Subsea Well Isolations
- ❑ Production & Pipeline Applications
- ❑ Well Decommissioning & Abandonments

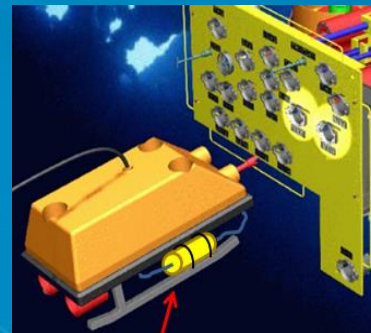

Wellhead Isolations

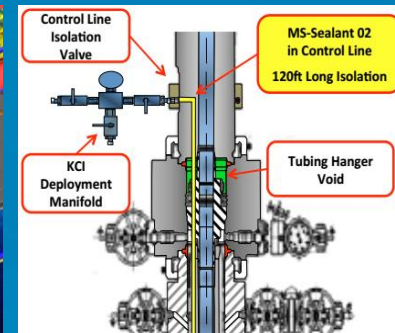

Gate Valve Isolations

Downhole Isolations

Subsea Applications

Well Abandonments

KCI Product	Description	Applications
Mac-Seal: A variety of “Time Activated” viscosity compounds	Leak Sealing Solutions High Pressure	Wellhead Seals, Tubing & Casing Hanger Seals, Wellhead Voids & Pack Offs
MS-Sealant: A variety of “Time Activated” viscosity compounds	Leak Sealing Solutions Medium to High Pressure	Wellhead Seals, Tubing & Casing Hanger Seals, Wellhead Voids & Pack Offs Formulated for Hotter Climates & Regions
Isolation Barrier System (IBS) Time Activated Compound and Breaker	Flexible non-porous gel with high compression load limits	Isolation Solutions including:- Production Pipelines, Ball Valves & Hybrid solutions Downhole Annulus Isolation of Packers & Casing Shoes
Mac-Pac: Non-Activated Sealant Compound	High Viscosity Sealing & Lubricating Compound	Ideal for leaking Gate Valve Isolations Energise Wellhead Seals as a more stable replacement for Plastic Packing
MHS-Protect: Paint on Anti-Corrosion Product	Corrosion & Erosion Protective Coatings	Protect Injection Fittings, Nuts, Bolts, Threaded Equipment & Splash Zones etc.
