GATE VALVE ISOLATION

ANTI-CORROSION

WELLHEAD SEAL ISOLATION

PACKER & CASING SHOE ISOLATION

RIGLESS WELL INTEGRITY & INTERVENTION ISOLATIONS

kciltd.co.uk

KCI IS A GLOBAL PROVIDER OF BESPOKE ENGINEERED LEAK SEALING SOLUTIONS FOR MATURE OR AGING OIL & GAS FACILITIES.

| Wellheads

| Process Plant

| Downhole

| Onshore

| Offshore

| Subsea

Wellhead Seal Isolation

Mac-Seal & MS-Sealant

Wellhead & Tubing Seal Isolation

Gate Valve Isolation

Mac-Pac

Valve Isolation Supporting Through Tubing Intervention

Annulus Management

Packer at 50° angle with IBS-SB deployed above

IBS-SB

Packer Isolation & Annulus Gas Migration Issues

Anti-Corrosion

MHS-Protect

Prevent Corrosion on Metal Surfaces

The Innovation in KCI's business comes from employing its Engineering expertise to support complex problems which may be difficult to resolve with conventional methods or technologies.

KCI products & services are recognised as examples of best practice for engineered leak sealing solutions for the worldwide oil, gas, process & renewable sectors, securing the company's strong reputation & integrity values.

KCI provide fully engineered products & services which increase safety, reduce costs, minimise downtime & maintain or increase production across surface, subsea, downhole, topside, pipeline, refinery, process plant & many other applications.

Wellhead Seal Isolation

Two part, time activated, various viscosity sealant which self-energises under differential pressure. Bridges large gaps & holes in seal structures unlike pressure activated sealants which require small gaps & high pressures to activate.

Rigless Isolations successfully deployed worldwide reinstating barriers to maintain safe & effective production.

- Protect Environmental Gasket between Wellhead Spools
- Isolate Lockdown Screw Packing
- Safeguard Failed Injection Fittings
- Reinststate Void Casing Slab Seals & Pack-Off's

Gate Valve Isolation

Deployed as a high viscous fluid, very effective alternative to plastic packing & ideal for re-energising damaged "P" seals.

- Provides a Repeatable Isolation for Failed Gate Valves & Valve Stem Packing Leaks
- Remains in the Valve Cavity Much Longer than Standard Grease
- Provides Protection Against Well Debris & Corrosive Fluids
- Operational Temperature of -50° to +250°C
- Displace & Replace Existing Valve Grease Providing a Superior High Temperature Lubricant
- No Issues with Future Valve Operating Torque, Production Flow, Wireline or Coiled Tubing Activity

Packer & Casing Shoe Isolation

Designed & formulated to provide isolations within annuli preventing gas migration. IBS-SB can be weighted to sink through existing heavy fluids. Small volumes required, no squeezing or bull heading required. Ideal for:

- Production Packer Element Damage
- Damaged Cement Shoe
- Micro Annuli or Porosity issues
- Simple & Effective
- Very High Success Rate

Anti-Corrosion

- Designed & Formulated to be Applied Directly on to Most Surface Areas
- Very Little Preparation Required for Corrosion Protection
- Cost Effective to Apply
- Reduces Downtime Costs when Removing Nuts & Bolts

MHS-Protect extends the life of the asset. It is easy to apply & remove across various applications.

Insert to UV. Power wash to clean before & after application with **K Cleanse 100** recommended.

- For trouble free access to studs & nuts
- Flows around cables to seal
- Easily removed for inspection or maintenance

Subsea Deployment Skids

DNV Certified Subsea Deployment Skids & Umbilical Hose Reel.

Easy to fill and reload for a Fast Turnaround.

Each Deployment Skid has 8 x 5 Litre Deployment Tools giving a 40 Litre output capacity.

3000psi Output Pressure.

Suitable for Deploying Tree Valve Grease or KCI's Isolation and Sealant Products in Subsea Applications.

- The Skids are compact and easy to handle to limit vessel deck space.
- The Deployment Tools are simple to use with Diver friendly control panels.
- Designed for Subsea Valve and Pipeline isolations.
